

Content + Creativity + Technology = REMIX your classroom and teaching through iPads!

This class will focus on using iPads as an effective teaching tool in the classroom. We will discuss ways to use the iPad to organize, plan and differentiate instruction. With the help of Bloom's Taxonomy we will explore i-devices and their applications to help strengthen instruction and unlock the creative potential of students. iPads are a powerful tool that can help us as educators implement interventions and promote high levels of student thinking and learning. We will offer a menu of technology infused product choices and lessons to help students create something big! Whether you have one iPad or a class supply, we will share ideas for getting the most out of the latest technology available to our students. You will leave with ideas and resources that will help you put your ideas into action and will learn how to avoid spinning your wheels or getting stuck on a roadblock. This class is certain to increase your knowledge and advance your understanding. Instruction will be differentiated for a variety of learners and subjects.
